Eco-friendly italian papers

These new eco-friendly papers are made using process residues from organic products to replace up to 15% of virgin tree pulp. By - products from kiwi, almonds, citrus fruits, hazelnut and lavender - which would normally be processed as fillers in animal food and fertilizers or simply dumped in landfill - are among the natural raw materials used. Elements of each different material are visible on the surface of the papers giving a distinctive texture and appearance. The papers are FSC certified, contain 30% post-consumer recycled waste and are produced with 100% green energy. The production process is protected by European patent.

Digital stationery for inkjet or laser printing.

Rossi 1931 has combined old and new world technologies by inventing the same soft papers ready for digital printing. The impritable Rossi cards and sheets are specially manufactured to tear from a master sheet after printing, replicating perfectly, the soft deckle of their traditional boxed cards.

This collection counts the highest number of imitation.

From the large assortment of the – by now famous – “Social Stationery” collection, this is our proposal for writing paper and cards in 10/10 boxes with the practical transparent lid. The manually deckled papers and cards come with matching soft envelopes of 120 gr. For a sophisticated correspondence, a mandatory choice between the classic white and the more unusual cream color.

Eco-friendly italian papers

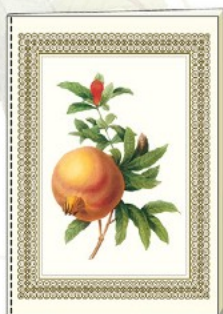

These new eco-friendly papers are made using process residues from organic products to replace up to 15% of virgin tree pulp. By - products from kiwi, citrus fruits, and grapes - which would normally be processed as fillers in animal food and fertilizers or simply dumped in landfill - are among the natural raw materials used.

*Elements of each different material are visible on the surface of the papers giving a distinctive texture and appearance. The papers are **FSC** certified, contain 30% post-consumer recycled waste and are produced with 100% green energy.*

The production process is protected by European patent.
